Disclosure Statement

This report is for informational & educational purposes only. The data contained herein is believed to be accurate. However, there is no guarantee as to the accuracy of this report.

Any decision to enter into a commodity futures contract is solely the responsibility of the subscriber. Neither the author nor the publisher assumes any responsibility for the decisions of each individual subscriber.

Trading commodities is incredibly risky. The vast majority of people who trade commodities will lose money. Based on my personal experience, about 80% of all traders will lose. If you expect to "get rich" as a trader, you will be disappointed. It won't happen. In fact, I would encourage most people to completely avoid commodity trading.

My market analysis could be completely wrong. The majority of my trades are losers. Trade at your own risk. Always use protective stops. Never risk more than you can afford to lose.

Account statements are available upon request in order to verify my trades.
